Abstract (en)

[origin: WO2015150700A1] The invention relates to an assembly for dispensing a fluid or pasty product including a dispensing device such as a mechanical pump (1, 1a) with a dispensing push-button 3, associated with a container (2) containing a quantity N+R of said product, characterised by including means for stopping or blocking the removal of said product, taking place after the amount N has been dispensed and isolating, inside the container (2), a product supply R that can be used only in a second attempt after the user has activated said supply R using an unblocking system 19, and alerting the user of the upcoming end of the fluid or pasty product to be dispensed. The assembly for dispensing a fluid or pasty product according to the present invention is particularly suitable for the use of creams contained in opaque or semi-opaque bottles, such as cosmetic or pharmaceutical creams, but also for alcoholic products such as perfumes or sensitive pharmaceutical products.
