Abstract (en)

[origin: WO2015121598A1] The invention relates to a steam iron device for ironing and removing creases, for especially vertical crease removal operations, comprising a heating body (3), a boiler or the like for producing steam (V), a water reservoir, and a metal sole (2) pierced with holes (23) for the passage of steam (J). The outer wall (20) of the sole (2) has a partially curved shape, comprising two parts, a front flat part (21) and a rear curved convex part (22) to which said flat part (21) is tangential.
