Abstract (en)

[origin: WO2015150308A1] The invention relates to a recessed ceiling lamp for installing in an installation opening of a suspended ceiling (1) having a lamp housing (2), a light outlet opening, and an air passage element (4) arranged laterally adjacent to the light outlet opening, which air passage element has at least one air passage opening (41), wherein the lamp is designed in such a way that, in the installed state, air from a first room region (R1) below the suspended ceiling (1) can flow through the at least one air passage opening (41) into a second room region (R2), which extends above the suspended ceiling (1) adjacently to the lamp housing (2).
