Abstract (en)
[origin: WO2015104483A1] The invention relates to a man-machine interface (10) for a motor vehicle, comprising: at least one mechanical control button (12, 14, 16) for controlling a function of an element of the motor vehicle, and a tactile screen (20) for controlling a set of functions of elements of the motor vehicle, characterised in that the function assigned to the control button is selected from the set of functions of the motor vehicle that can be controlled by the tactile screen, the man-machine interface being designed to communicate with a controller (18) allowing different functions to be assigned to the control button.
