Abstract (en)

[origin: WO2017025463A1] The invention relates to a method for filling and welding film bags, wherein a plurality of film bags that are accommodated one after another on a rotating carousel are filled by means of a plurality of filling stations arranged on the rotating carousel and subsequently the filled film bags are guided in succession, by means of the rotating carousel, past a welding station, assigned to the rotating carousel and arranged in a stationary manner on the rotating carousel, for welding of the filled film bags, wherein the welding station comprises at least one welding device. The invention also relates to a filling and welding device for carrying out this method, having a rotating carousel with a plurality of filling stations, arranged thereon, for filling film bags, and a welding station, assigned to the carousel and arranged in a stationary manner on the rotating carousel, for welding the filled film bags, wherein the welding station comprises at least one welding device.
