Abstract (en)
The present invention relates to a gas burner (10), in particular for a cooking top (1) for household use, comprising: - a base (20) equipped with a Venturi element (21) adapted to receive a gas coming from an injector (4), and with a duct (22) for supplying the gas to said burner (10); - a burner body (30) associated with the base (20) and comprising a hole (31) for the passage of an air-gas mixture coming from said duct (22); - a flame divider (40) associated with said burner body (30) and comprising a plurality of apertures (41) to allow the air-gas mixture to exit. The peculiar characteristic of the present invention is that said base (20) is made from sheet, in particular metal or metal-alloy sheet, which is shaped by deep drawing.
