Abstract (en)  
[origin: EP2728555A2] The key (1) has a housing element (2) comprising a through-hole that is formed inside of the housing element. An elastic tab element with a key (3a) is provided on a side facing the housing element, and an extension attachment is provided on another side for actuation purposes. The elastic tab element is attached to the housing element and covers the through hole. Bracket-type holding elements (9a, 9b) are provided to the tab element exhibiting long side (8a) of the housing element, where the tab element is defined at the housing element.
