Abstract (en)
[origin: EP3128488A1] The invention relates to a device for facilitating the mixing of balls in drums of recreational games which is especially designed to improve the mixing of the balls (5) in a drum (3) of a recreational machine of chance. It consists of a horizontally long laminar part (1), in the form of a plate, provided at the ends thereof with means for attaching inside the drum (3) in an articulated or pivoting manner, according to the rotational shaft of said drum (3), said part (1) having an essentially rectangular configuration, the side edges of which have a convergence (6) so as to fit with the inner curvature of the drum (3), whereas the lower edge is provided with notches (7) which are suitable in terms of the shape and size thereof for allowing the balls (5) housed in the drum (3) to pass therethrough.
