Abstract (en)
[origin: WO2015155485A1] The present invention relates to a new generation of biocidal products which do not pose any particular risks to the environment or health. Indeed, the active substances and additives that constitute the biocidal products according to the invention are of plant, agricultural, and renewable origin, and are furthermore completely biodegradable. The various uses of said novel biocidal products are also claimed. Specifically, the invention relates to a concentrated biodegradable biocidal formulation, comprising compounds from renewable plant resources, said formulation being characterised in that it comprises at least the following compounds: at least lactic acid and/or citric acid in a proportion of 76 wt % to 98 wt % relative to the total weight of the formulation; at least one sodium and/or potassium carboxylate including 5 to 16 carbon atoms serving as an anionic surfactant in a proportion of 2 wt % to 24 wt % relative to the total weight of the formulation.
