Abstract (en)
[origin: WO2015155701A1] Piece of furniture (1) comprising: a body (2) provided with a base for support on the ground (3); a main work surface (4) parallel and spaced with respect to a surface (5) belonging to the body (2) and opposite to the base for support of the body (2) on the ground (3). The main work surface (4) and the body (2) are connected to each other through a pin (8) so as to define an interspace (6) in which one or more auxiliary work surfaces (7) provided with a slit (9) are inserted. The pin (8) passes through the slit (9) and allows the rotation of the auxiliary surfaces (7) around an axis coinciding with a longitudinal vertical axis (X) along which the pin (8) develops.
