Abstract (en)  
[origin: WO2015154970A1] The invention relates to a freezer cabinet in which foods are stored frozen for sale in a shop, with a freezer space surrounded by solid housing walls at the front, at the rear, at the sides and at the bottom, which freezer space, at its upper end, is accessible via a housing opening from a user-side front edge, which opening, in the closed state, is covered by a cover unit (2) with a cover part (10), adjoining the user-side edge and movable in a forwards/backwards direction, and a stationary rear cover part (40) located away from the user-side edge. An advantageous embodiment is one in which, in order to open it, the front cover part (20) arranged in front of the rear cover part (40) in the closed state and/or a central cover part (30) can be pushed at least partially over the rear cover part (40) (Fig. 1A).
