Abstract (en)

[origin: WO2015157725A1] An example system includes an electromagnetic stimulation module for applying an electromagnetic field to bodily tissue. The electromagnetic stimulation module includes an electromagnetic field generator, and an antenna coupled to the generator and arranged to radiate the electromagnetic field, a power source coupled to the generator, and an activator to initiate radiation of the electromagnetic field. The system also includes a negative pressure module for applying negative pressure to bodily tissue. The negative pressure module includes a patch, a tubing coupled of the patch, and a negative pressure generator coupled to the tubing and arranged to induce a negative pressure on an underside of the patch.
