Abstract (en)

[origin: WO2015150804A1] A blank (100) for forming a wrap-around pack for foodstuffs, comprising : a section of plastics film substrate 110), the film substrate section being generally rectangular with a front edge, a rear edge, and first and second outer edges, the outer edges being substantially parallel to the direction (111) the blank is fed during assembly of the wrap-around pack; one or more sections of paperboard (130,150), adhesively attached to an outer surface of the film substrate, at least one section of the paperboard having at least one fold line (140), the fold line being substantially parallel to the outer edges of the film substrate; an end portion, composed of the film substrate with no paperboard attached to it, such that, when the pack is assembled, the end portion defines a free end of the wrap-around pack that can be heat sealed; and wherein the fold line (140) defines at least two panels of the paperboard section(130), the panels arranged to be mutually angled when the pack is assembled.
