Abstract (en)
[origin: WO2015144793A1] The support (10) for a screen comprises: - means (105) of fixing the screen (110) to the support, the screen once fixed, forming a substantially horizontal plane, - a central unit (115) comprising: - a screen-control means (120) and - a means (125) of defining at least two display zones (130) of the screen, at least two of these display zones having: - a direction of reading toward a different edge of the screen and - information associated with but different from at least one other item of information displayed in another display zone, - a touch-sensitive means (135) of controlling the central unit positioned on the screen.
