Abstract (en)
[origin: WO2015154735A1] The invention relates to a protective plate for at least one plug connector attached to a mounting rail, said protective plate having a substantially U-shaped basic form with a closed main surface (2) and side surfaces (3, 3') angled at approximately 90° to the main surface, wherein a securing region (5, 5') is angled at approximately 90° to the side surfaces (3, 3'), said securing region (5, 5') having at least one hole (6), and wherein an abutting region (7, 7') is angled at approximately 90° to the side surfaces (3, 3'), said securing region (5, 5') and the corresponding abutting region (7, 7') being positioned approximately perpendicular to one another. The system, formed by protective plate, a mounting rail (8) and at least one plug connector (9), is optimally coordinated.
