Abstract (en)
A leisure chair includes a seat (2) movably mounted on top of a base (1). The seat (2) includes a front rod (21) extending between two lateral rods (22,31). A backrest (3) is connected to the rear side of the seat (2). A footrest unit (4) includes at least one first link and at least one second link. Forward movement of the seat (2) causes the at least one first link and the at least one second link to pivot and causes the footrest unit (4) to fold and move to the storage position below the seat (2). The at least one first link and the at least one second link form a folded part of the footrest unit (4). Rearward movement of the seat (2) causes the at least one first link and the at least one second link to pivot and extend and causes the footrest (4) to extend and move to the extended position in front of the seat (2).
