Abstract (en)

An automatic station (1) to cover a support (7) with a membrane element (8), comprises an articulated arm (4), a stapler (5) moved by the articulated arm (4), a fixing sub-station (2) to retain the membrane element (8) in a predefined position on the support (7), and a gripping element (18) moved by the articulated arm (4) and adapted to hook an edge portion (9) of the membrane element (8) while the support (7) is retained by the fixing sub-station (2) to tension the edge portion (9) before the stapler (5) fixes the edge portion (9) to the support (7).
