Abstract (en)
The invention relates to a device for coupling a lamp to a foldable music stand with an ornament, said device comprising a clamping device to be coupled to a top side of the music stand and that is embodied for holding a lighting element, wherein the device comprises a recess for receiving therein a part of the music stand and wherein the clamping device is embodied for clampingly holding that part of the music stand that is held clampingly in the recess. The device is characterized in that it further comprises a through opening for holding therein at least part of an ornament of the music stand.
