Abstract (en)

[origin: EP3131087A1] The present disclosure discloses a method and device for reducing display brightness, and belongs to the technical field of display. According to the present disclosure, a transformed gamma curve is acquired, a corresponding grayscale voltage in the transformed gamma curve is queried according to a grayscale pixel value of a pixel to be displayed, and the queried grayscale voltage is output to a data line corresponding to the pixel in a liquid crystal display screen at a scanning moment corresponding to the pixel.
