Abstract (en)

[origin: CA2945607A1] The invention relates to a device for storing and providing at least one oral nursing element (10) for an infant and/or a small child, comprising a storage unit (12) for storing the oral nursing element (10), a filling unit (14) for filling the storage unit (12) with the at least one oral nursing element (10), and a dispensing unit (16) for removing the at least one oral nursing element (10) from the storage unit (12). The invention also relates to at least one device with a conveying device (18) for conveying the at least one oral nursing element (10) from the filling unit (14) to the dispensing unit (16).
