Abstract (en)

[origin: WO2015158572A1] The present invention relates to a hair cutting appliance (10) and to a blade set (20) for a hair cutting appliance (10). Said blade set (20) comprises a stationary blade (22) comprising a first wall portion (100) and a second wall portion (102) that define therebetween a guide slot (96), a movable cutter blade (24) received at the guide slot (96), and a transmitting member (70) configured to be engaged by a driving member, wherein the transmitting member (70) is further configured to actuate the movable cutter blade (24) relative to the stationary blade (22), wherein the movable cutter blade (24) is laterally inserted into the guide slot (96), wherein the transmitting member (70) is fed to the stationary blade (22) in a feed direction (190) that is different from an insertion direction (188) of the movable cutter blade (24), and wherein the transmitting member (70) is coupled to the movable cutter blade (24), particularly to a main portion (78) thereof, such that the movable cutter blade (24) is secured at the stationary blade (22), particularly undetachably retained. The disclosure further relates to a method for manufacturing a respective blade (22).
