Abstract (en)
[origin: WO2015158662A2] The invention relates to a method for operating an elevator installation, an elevator control device, and a radio unit for carrying out the method, and to a system having such an elevator control device and a mobile radio unit. The invention relates to a method for operating an elevator installation (10) and to an elevator control device (16) operating according to the method, wherein, by means of at least one sensor (30) allocated to the elevator installation (10) and by means of a sensor signal (38) obtainable therefrom, a state of the elevator installation (10) is automatically detected, wherein, in dependence on the detected state, an activation signal (42) is automatically generated and wherein, by means of the activation signal (42), a remote signaling element (44) is automatically activated.
