Abstract (en)  
A pouch (14) for at least one cigarette paper booklet (12) is described. The pouch (14) provides a compartment for accommodation of at least one cigarette paper booklet (12). The compartment has at least one slot (16) through which a paper sheet of the cigarette paper booklet can extend. Further, the compartment is permanently closed on all sides except the at least one slot (16). The pouch (14) comprises a lid portion (20) for covering the slot (16). The pouch (14) has at least one attachment portion (23) with a first attachment means (24) for being releasably attached to a surface of the remainder of the pouch (14). At least the attachment portion (23) is formed by a flexible sheet laminate comprising a first layer and a second layer. The first attachment means (24) is arranged at the first layer (36) in a section in which the first layer (36) is at least partially peelable with respect to the second layer. Alternatively, the first attachment means (24) is arranged at the first layer in a section in which the second layer is at least partially peelable with respect to the first layer. Further, a blank for manufacturing a pouch (14) and a cigarette paper dispenser (10) are disclosed as well as methods of manufacturing a pouch (14) and a cigarette dispenser (10).
