Abstract (en)

[origin: US2017049215A1] An applicator and an associated applicator assembly for a cosmetic product. The applicator has a core having a main longitudinal extension direction (X), and a plurality of protrusions projecting from the core in a direction which is perpendicular (Y) to the main direction (X). At least one of the protrusions has a first portion having a proximal end which is in contact with the core and an opposite distal end along the perpendicular direction (Y), and a second portion having a proximal end in the region of the distal end of the first portion and a free distal end. The second portion being angularly offset with respect to the first portion in such a way that the first and second portions are located on both sides of a plane (P) containing the main direction (X) and the perpendicular direction Y.
