Abstract (en)  
[origin: US2017049233A1] A device for moving a movable furniture part, the device including a force accumulator such that by way of the device which is fitted to an item of furniture the movable furniture part in the case of an opening procedure under the action of the force accumulator is capable of being put in the opening direction, wherein in the case of a movement of the movable furniture part in the closing direction a charging procedure of the force accumulator is performed, and wherein the force accumulator by way of a coupling installation couples to an ejector so as to eject the movable furniture part. The coupling installation includes a lever assembly designed in such a manner that a force for the charging procedure of the force accumulator, which is introduced at the ejector, by means of the lever assembly is transmitted in a geared manner to the force accumulator.
