Abstract (en)

[origin: WO2015164433A1] A composition for the treatment of acne includes hydrolyzed psoralea corylifolia, containing a component bakuchiol, is solubilized in a water-based solution. The composition is for topical application to the skin. In various implementations, the composition is a water-based acne gel or a water-based cleanser. In a specific implementation, a composition includes Bakutrol(TM), which includes bakuchiol, and bisabolol. The composition can include a polysorbate surfactant. In implementations, these ingredients are combined with other active ingredients, including for example, salicylic acid, benzoyl peroxide, tretinoin, retinol, tazarotene, or an antibiotic, or a combination of these. A process of preparation of the composition allows for the stabilization of Bakutrol in solution.
