Abstract (en)
[origin: WO2015163804A1] The present invention relates to a hand truck comprising a frame (2), a load platform (1) protruding from the frame having a rear portion (21) and a front portion (20), a first and second wheel (6a, 6b) for supporting the platform, and rotatably connected to a first and second primary axis (x1a, x1b) respectively, and a first and second turning unit to turn the first and second wheel respectively at least 90° in relation to the frame about a first and second secondary axis (x2a, x2b) respectively extending orthogonally to the first and second primary axis respectively. The first and second wheels support the rear portion of the load platform, and the hand truck comprises at least one rotatable third wheel (7; 7a-b) to support the front portion of the platform. The third wheel is smaller than the first and second wheels.
