Abstract (en)

[origin: WO2015162096A1] The invention relates to a method for operating a mobile crane (1) with a boom (5), having the following steps: - ascertaining maximally allowable support loads for multiple positions in a specified positioning range of the boom (5); - ascertaining a support load limit and/or one or more support load ranges on the basis of a suspended load and the maximally allowable support loads for the multiple positions of the specified positioning range of the boom (5); and - operating the mobile crane (1) on the basis of the support load limit and/or one or more support load ranges.
