Abstract (en)
[origin: WO2016016047A1] The invention relates to a mobile hall construction (1), in particular for carrying out maintenance and/or repair work on a turbine rotor (24), comprising at least one base frame (2), a plurality of support pillars (4) which are held on the at least one base frame (2), and a roof structure (6) which can be mounted on the support pillars (4), wherein the support pillars (4) are provided with at least one drive (5) and are articulately mounted on the at least one base frame (2) in such a way that, with the use of the at least one drive (5), they can be pivoted between a transport position and a straightened-up position relative to the at least one base frame (2).
