Abstract (en)

[origin: WO2015163797A1] The invention concerns a method for glazing a door blade (2). The method comprises: - creating an opening (50) in the door blade (2), the opening (50) being delimited by an internal edge (3) of the door blade (2), - placing a glazed unit (10) in the opening such that a slot (51) is formed between a periphery (11) of the glazed unit (10) and the internal edge (3) of the door blade (2), - filling the slot (51) at least partly with an adhesive, thus forming a joint (20) between the periphery (11) of the glazed unit (10) and at least a portion of the internal edge (3) of the door blade (2), and - allowing the adhesive to cure. The invention further concerns a door (1) comprising a door blade (2) and a glazed unit (10) fitted to the door blade (2) according to said method.
