Abstract (en)
[origin: WO2015162071A1] The invention relates to an antenna support to be mounted on an electrical board (2) and used to carry an antenna (3) which is electrically connected to the board (2), the support comprising: a plurality of housings, each one suitable for receiving the antenna (3) according to different orientations; means for adjusting the position of the antenna (3) on the board (2); and means for fixing the support to the board (2). The invention also relates to an electrical board provided with an antenna support. The invention further relates to a method for positioning an antenna to be connected to an electrical board, and to a method for producing an electrical board connected to an antenna.
