Abstract (en)

The invention relates to a household appliance (1) comprising at least one seat (21,24) and one gasket (5,6) which can be positioned into said seat (21) in order to isolate a first inner space of said household appliance from a second inner space of said household appliance (1) and/or from an outside environment, and which is so configured that, when it is inserted into said seat (21,24), it will deform and generate a force that will keep it firmly coupled to said seat (21,24).
