Abstract (en)
[origin: EP3135352A1] Game board comprising: - a base (2); - a number of rotational elements with a central rotation axis (23, 6), wherein the rotational elements are arranged evenly distributed on the base (2), wherein the rotation axes are parallel to each other, wherein the rotation axis (23, 6) of a rotational element (3, 5) has a uniform distance to the rotation axes of adjacent rotational elements, wherein the rotational elements comprise interlocking zones evenly distributed around the rotation axis (23, 6) for interlocking with adjacent rotation elements and wherein the rotational elements can be lifted from the base (2) to change the rotational position of a rotational element (3, 5); and - a plurality of game pieces (25) removably arranged on the rotational elements at least partially overlapping an interlocking zone (7).
