Abstract (en)
The present invention relates to a door handle (20) for a door (16) of a domestic appliance (10), in particular for an oven door (16) of a cooking oven (10). The door handle (20) comprises an elongated handle bar (24) formed as a hollow profile part or as a pipe and at least one handle adapter (26), preferably two handle adapters (26), connectable or connected to the handle bar (24) at its front side and connectable to the door (16) at its rear side. The door handle (20) comprises at least one housing (34) removably attached at the handle bar (24). The handle bar (24) includes at least one recess (70) for receiving at least partially the housing (34). The housing (34) includes an open side facing the recess (70) of the door handle (20), so that an inner space (62) of the door handle (20) is enlarged by said housing (34). The door handle (20) comprises an electric device (28) arranged or arrangeable inside the housing (34) and/or inside the handle bar (24) next to said housing (34). The handle adapter (26) includes at least one cable opening (74) at its rear side. The door handle (20) comprises at least one wiring cable (72) extending inside the handle bar between the electric device (28) and the cable opening (74) of the handle adapter (26).
