Abstract (en)
[origin: WO2015166369A1] Portable bar counter (1), provided on the lower part with wheels, comprising a plurality of components, with rectangular prismatic profile, that can be assembled together, said counter (1) having a first closed configuration, adapted for the transport of said counter (1) and a second open configuration adapted for the use of the counter (1), said counter (1) comprising: a support structure (4); a system (5) of panels (6) that are movable with respect to surface hinges (7'), and connected to said structure (4), due to further surface hinges (7''); a work surface (8); at least one shelf (9); at least two shoulders (11) connected to said surface (8) due to surface hinges (12) that allow spatially orienting said shoulders (11) vertically with respect to the surface (8); at least one stabilizing support (10) to be placed orthogonally along the front edges (15) of the surface (8) of the counter (1), said bar counter (1) being characterized in that the assembly between its components occurs due to mortise joints (16) represented by cavities and projections mating with each other, said mortise joints (16) also being covered by the metal layer (16') showing magnetic properties, or by the layer (16'') of rubberized material.
