Abstract (en)

[origin: WO2015166028A1] In order to solve the problem of providing a dispenser in which use can be made of sheet-like products of different widths wound up into rolls, the invention proposes such a dispenser having a cover part with a front wall and also a housing part, the housing part comprising a rear wall and a first and a second side wall, to form an interior, wherein a pressure-exerting arm is provided, this being mounted at one end and interacting with an adjusting means, and therefore an insertable roll is subjected to pressure in a direction from one side wall to the other side wall.
