Abstract (en)

[origin: WO2015162221A1] The invention relates to a vibrating armature pump, in particular a high-pressure vibrating armature pump, for a household appliance, said pump comprising a piston guide (11a; 11b; 11c) for guiding a piston element (12a; 12b; 12c), a pump spring (13a; 13b; 13c) designed to apply an actuating force to the piston element (12a; 12b; 12c), and a casing unit (14a; 14b; 14c) having at least one flux-conducting element (15a; 15b; 15c) that is designed to conduct a magnetic flux generated by a magnet actuator. In a mounted state, the flux-conducting element (15a; 15b; 15c) is arranged in a radial direction between the pump spring (13a; 13b; 13c) and the piston guide (11a; 11b; 11c).
