Abstract (en)

[origin: US2017065082A1] A guide device for guiding a furniture pull-out moveable relative to a furniture body comprises: at least one guide unit having a body rail that can be fastened to the furniture body and at least one running rail that is displaceably mounted relative to the body rail; and a functional device comprising at least a first functional element that can be fastened to the moveable furniture pull-out, at least one body-sided second functional element, both functional elements being guided on one another during the retraction movement and/or the extension movement of the furniture pull-out, and a catch device having a bearing mechanism by which the first or second functional element can be moveably hung and having a control surface formed on the first and/or second functional element by which the moveable first functional element can be captured to subsequently guide on the second functional element.
