Abstract (en)
[origin: WO2015169694A1] The invention relates inter alia to a video endoscope (1) comprising an endoscope shaft (2), an optical assembly (26) being provided in the distal region of said endoscope shaft (2) and said assembly (26) being mounted in the endoscope shaft (2) by means of a mounting for the assembly (26). The video endoscope (1) is characterised in that the mounting for the assembly (26) has at least one or more reversibly deformable bending actuators (30.1, 30.2, 30.3, 30.4), said bending actuator or bending actuators (30.1, 30.2, 30.3, 30.4) being designed, in particular, to move the assembly (26) during a movement of the bending actuator or bending actuators (30.1, 30.2, 30.3, 30.4).
