Abstract (en)
[origin: EP3141493A1] An assemblable pallet (1) includes a pallet frame (2), first base members (3), second base members (4), and a loading plate (6) fixed on the pallet frame (2). The pallet frame (2) includes longitudinal bars (21) and transversal bars (22). Each of the longitudinal bars (21) and the transversal bars (22) has a step-shaped positioning portion (211/221). Each of the first base members (3) includes first step-shaped connecting portions (32) for guiding the step-shaped positioning portion (211) of the longitudinal bar (21) and the step-shaped positioning portion (221) of the transversal bar (22). Each of the second base members (4) includes a second step-shaped connecting portion (42) for guiding the step-shaped positioning portion (211) of the longitudinal bar (21) and the step-shaped positioning portion (221) of the transversal bar (22). Accordingly, the longitudinal bar (21) or the transversal bar (22) would not be unaligned with or protruded from the base member during the assembly, and the assemblable pallet (1) can be assembled in an efficient and convenient way.
