Abstract (en)

[origin: EP3141494A1] Closure (1) for a non-refillable container intended for serving a liquid (L) such as oil or vinegar, which comprises; a base piece (2) for inserting in the neck (4a) of said container, a non-removable cap (3) which is associated to said base piece (2) in such a way that it is capable of being vertically displaced in relation to it, from a closed position to an upper position to allow the liquid (L) to exit, and characterised in that said base piece (2) comprises two coaxial bodies (2a,2b) with a substantially tubular configuration which are disposed concentrically inside the neck (4a) of said container, once the piece (2) is inserted, said cap (3) being capable of being inserted non-removably inside the tubular body (2a) which occupies the inner coaxial position, the open space between the walls of both coaxial bodies (2a,2b) defining an opening (6) for the liquid to exit and air to enter simultaneously, said non-removable cap (3) including a lid (9) which is configured to prevent the exit of liquid (L) through said opening (6).
