Abstract (en)
A device for heating rail switches as consisting of a sliding plate (1) with the upper part (3) with a sliding surface (9) and of a base plate (2) fitted with an induction heater (12) consisting of an inductor (4) and a winding placed inside the sliding plate (1) connected to a power source. The induction heater (12) has a shape similar to a cylinder with an annular hollow (5) where a coil spool (6) is placed as mounted on an inductor pin (10) and the induction heater (12) is located inside a hollow (11) in the sliding plate (1).
