Abstract (en)

[origin: WO2015172965A1] The invention relates to a device (1) and a method for holding together and transporting a metal band rolled up into a coil (3) after rolling up the same in a coiling station (5). The device (1) comprises a removal trolley (20) for receiving the coil (3) in the coiling station (5) and for transporting the coil (3) from the coiling station (5). The device (1) further comprises a coil safety device, which is designed to place a securing sling (40) around the coil (3) fixed on at least part of the circumference, such that the coil (3) is held together by the securing sling (40) and is pressed onto the removal trolley (20).
