Abstract (en)
[origin: WO2016008667A1] A telescopic arrangement has a first cylindrical portion (6) and a second cylindrical portion (7). An overlapping zone in which the cylindrical portions (6, 7) overlap in a telescopable manner is formed between the cylindrical portions (6, 7). A fastening mechanism grips in the overlapping zone in order to define the positions of the first and second cylindrical portions (6, 7) relative to one another.
