Abstract (en)

[origin: EP3144433A1] An assembly of a concealed sanitary fitting (10) comprises a connecting member (12) for installation in an installation recess of a sanitary installation and a valve function unit (30). For compensation of a chaotic laying the assembly comprises a water passage diverter element (44) which comprises a counter-connection interface (50) corresponding to a counter-connection interface (32) of the valve function unit (30) and a connection interface (46) corresponding to a connection-interface (16) of the connecting member (12). The connection interface (46) comprises connection openings (48a, 48b, 48c, 48d) and the counter-connection interface (50) comprises counter-connection openings (52a, 52b, 52c, 52d), wherein the counter-connection openings (52a, 52b, 52c, 52d) are connected with the connection openings (48a, 48b, 48c, 48d) via internal water passages (60, 62). Furthermore, at least one of the counter-connection openings (52a, 52c) is connected with a connection openings (48c, 48a) that is not aligned with the at least one of the counter-connection openings (52a, 52c).
