Abstract (en)
  [origin: WO2015177696A1] A backpack comprising a body defining a first cavity for storing items and a second cavity which is separate from the first cavity. A pair of shoulder straps is attached to and extends from the body for mounting the backpack to a user of the backpack. A first garment is attached to the second cavity and received therein. The first garment has one or more actuation means. The second cavity has an opening through which the or each actuation means extends so that the actuation means can be grasped by a user and pulled to urge the first garment out from the second cavity via the opening.
