Abstract (en)

[origin: WO2015176819A1] The invention relates to a method for joining a first component (24) to at least one second component by means of at least one joining element (36) which is inserted at a joining site (34) into the component (24), wherein the joining element (36) is pressed into the component (24) by an industrial robot (10) at a speed of less than five metres per second.
