Abstract (en)

[origin: WO2015178845A1] The present invention relates to a method for the adaptation of the speed of a vehicle when taking a curve. The method comprises the step to control (S1) the speed of the vehicle based on the steering wheel angle of the vehicle corresponding to a determined turning radius such that a predetermined lateral acceleration is not exceeded. The present invention relates also to a system for the adaptation of the speed of a vehicle when taking a curve. The present invention relates also to a motor vehicle. The present invention relates also to a computer program and a computer program product.
