Abstract (en)

[origin: WO2015178844A1] The present invention relates to a method for the safe driving of a vehicle when taking a curve, comprising the steps to determine continuously (S1) the current speed of the vehicle, and to warn (S2) the driver in the case in which the current retardation before taking a curve is insufficient. The method comprises further the step to determine continuously (S3) whether the driving of the vehicle is being controlled automatically or manually by the driver of the vehicle, whereby warning takes place depending on whether the driving of the vehicle is being controlled automatically or manually. The present invention relates also to a system for the safe driving of a vehicle when taking a curve. The present invention relates also to a motor vehicle. The present invention relates also to a computer program and a computer program product.
