Abstract (en)
[origin: WO2016008871A1] The invention relates to a method for stabilizing a rail vehicle (2) with a wheelset (12), in which the speed (84, 86, v) of the rail vehicle (2) is changed when a critical vibration state (KSZ) of the wheelset (12) occurs. An advantageous method can be achieved if the speed (84, 86, v) of the rail vehicle (2) is changed (110, 140) by using a vibration state variable (66) of the wheelset (12).
